

Larry's Place

Petersburg, No. Grocery, Deli, Bar & Grill

After visiting Petersburg and viewing both sites, the downtown site was chosen. This site contained the adequate square footage to accommodate the preferred floor space for both the grocery store and the distribution center. The grocery store is located on the south side of the site facing Main Street with access to a deli, and the distribution center on the back of the site containing two loading dock, one for large trucks, imbedded in the ground and one at ground level for smaller trailers. A parking lot for a farmers market, located behind the city office on the east, this giving back to the community. Located on the roof of the grocery store is a bar and grille which was added to the program. To go along with the bar and grille, a roof deck with direct access to the bar and grille and a roof garden for produce growth. In keeping with the nostalgia of the downtown, a large façade was incorporated. This façade is a green wall and is important for the sun shading through the summer months when vines are fully grown, but allowing for solar heat gain through the winter, as well as for privacy for people on the roof deck. In incorporating the needed program and addition of several more a complete design was accomplished.
