

## Boone County Sheriff's Department

Location: NE corner of 5th and State St | Designer: Brian Akert

The original Boone County Sheriff's Department in Albion, NE was being moved to make way for a large new public greenspace that was being proposed by another student. This new Sheriff's Department has an integrated rainwater collection system that helps water the vast greenspace on the city square. An intricate louver system helps blocks out sunlight in the summer and dematerializes itself at night, giving the illusion of a gradient view into the space.
